

Online seminar for Railway Clinical Hospitals' doctors "Japanese practice of preventive medicine"

Date: December 7th, 8th and 11th, 2020

Online seminar "Japanese practice of preventive medicine" was held for doctors who are belonging to Railway Clinical Hospitals, as a part of projects with Marubeni Corporation "Dissemination of Japanese medical check-ups and clinical techniques in Russia." 6 doctors from Kyushu University Hospital provided lectures about preventive medicine and early diagnosis in their specialties. There were many participants in each lecture and received meaningful and positive feedback.

【Contents of the Seminar】

Dr. Moriyama: Measures for detection of EGC with the help of endoscopy and improving diagnostic ability

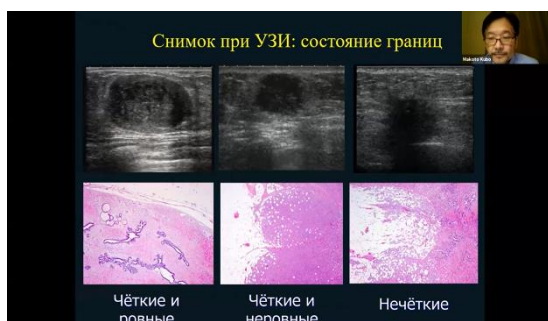

Dr. Kubo: Breast cancer screening and its significance and future prospects

Dr. Wakisaka: Risk management for prevention of the onset of stroke

Dr. Onoyama: Cervical cancer screening and HPV vaccine in Japan

Dr. Todaka: Routine clinical practice of cardiovascular region in Japan

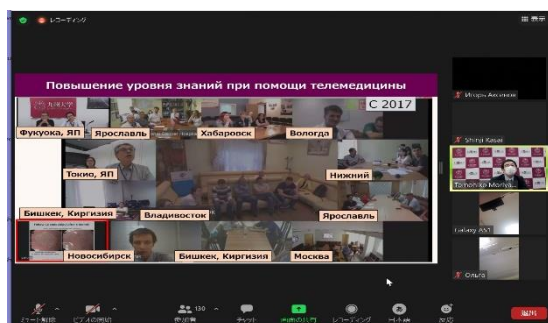

Dr. Inokuchi: Utility of multiparametric MRI for prostate cancer diagnosis
