

## JICA Area-Focused Training Course

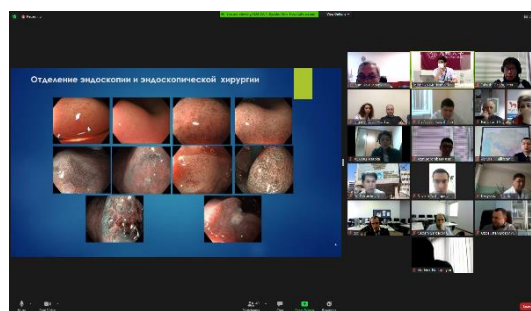

-Endoscopic diagnostics and therapeutics of early gastric cancer-

Date: February 25, 2021

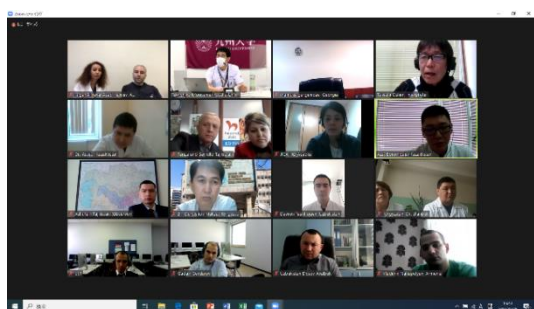

This webinar was held on behalf of human exchange program for endoscopists in Central Asia and Caucasus countries. Eight presenters from eight countries talked the current situation of gastric cancer diagnosis and treatment in their own institutes and countries. They also showed expectations for the endoscopy training at KUH. The standard protocol of endoscopy and tips for early gastric cancer detection were presented from KUH. Through the presentation and fruitful discussion, participants understood exact and useful technique of endoscopy in Japan.
