

## Online seminar for Russian Railway Clinical Hospitals' doctors "Japanese practice of preventive medicine" Part I

Date: December 8<sup>th</sup> and 9<sup>th</sup>, 2021

Online seminar "Japanese practice of preventive medicine" was held for Russian Railway Clinical Hospitals' doctors, as a part of projects with Marubeni Corporation "Dissemination of Japanese medical check-ups and clinical techniques in Russia." Three doctors from Kyushu University Hospital provided lectures in their specialties: Cardiology, Endoscopy and Diabetes. More than 200 Russian medical professionals participated in each lecture and showed a high level of interest. Many questions were asked during the Q&A session, and a lively exchange of opinions took place, including the differences in screening and treatment approaches between Japan and Russia.

### 【Contents of the Seminar】

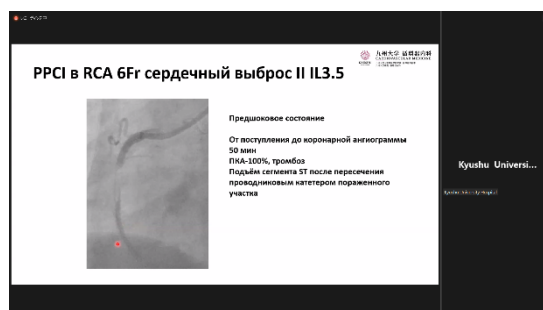

Dr. Matoba: Management of Acute Coronary Syndrome

Dr. Kawasaki: Endoscopic diagnosis and treatment of the colorectal epithelial neoplasm

Dr. Ohkuma: Glycemic management in diabetes with chronic kidney disease
