

Online seminar for Russian Railway Clinical Hospitals' doctors "Japanese practice of preventive medicine" Part II

Date: February 24th and 25th, 2022

Online seminar "Japanese practice of preventive medicine" was held for Russian Railway Clinical Hospitals' doctors, as a part of projects with Marubeni Corporation "Dissemination of Japanese medical check-ups and clinical techniques in Russia." Three doctors from Kyushu University Hospital provided lectures in their specialties: Liver disease, Hypertension and Respiratory disease. A total of more than 800 Russian medical professionals participated in the three lectures. During the Q&A session, many questions were asked about current medical trend in Japan including useful testing method in diagnosis, medication, and patient motivation for prevention and treatment.

【Contents of the Seminar】

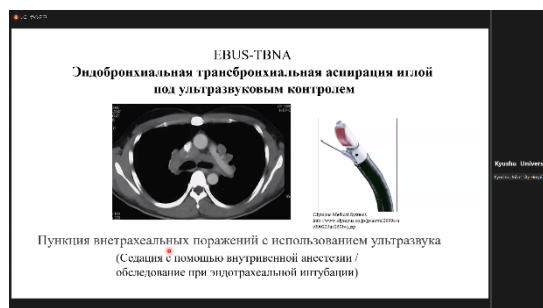

Dr. Kohjima: Metabolic disorder and Liver disease

Dr. Goto: Prevention and Management of Hypertension

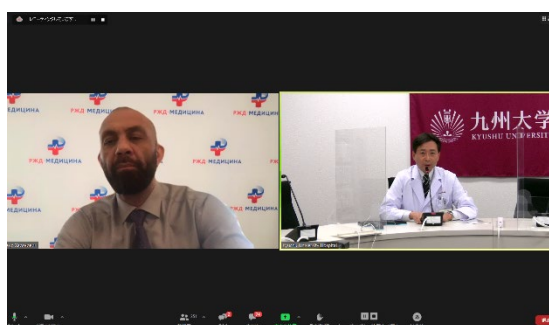

Dr. Tanaka: Current diagnoses and treatment strategies for Non-Small Cell Lung Cancer
