Dear Members and Organizers,
I am pleased to announce that the 14th Annual Meeting of the WFUMB, the 14th Congress of the FLAUS, and the 14th World Congress of Ultrasound in Medicine and Biology will be held in Rio de Janeiro, Brazil, from May 2 to 5, 2013. This is a great opportunity for us to meet and discuss the latest developments in the field of ultrasound. The program is very exciting and includes a variety of topics, including basic science, clinical applications, and education. We will also have a social program with a gala dinner and a concert. I hope you will all enjoy the meeting and the city of Rio de Janeiro. Please let me know if you have any questions. I will be happy to help. Sincerely,

The Value of Your Membership: Does US\$1.50 really make a difference?

WFUMB's five centers of excellence, such as its most recent center in Jakarta, Indonesia, provide a key resource to the ultrasound training of local medical practitioners.

WFUMB collects dues from its six affiliates—AUM, WFUMB, MASLI, the order of US\$1.50 per member. The funds are then applied to the various educational efforts organized by WFUMB volunteers and leadership. At a recent Education Committee meeting, the results of our funding were clearly apparent. WFUMB's various centers of Excellence (COEs), located in Bangladesh, Uganda, Venezuela, Romania, and Indonesia, conducted, had or on 24 annual workshops since 2004 and have 25 years of cumulative experience in providing ultrasound training in addition to the education projects which target three emerging regions: Africa, Asia, and Latin America. Each region's activity is coordinated through a WFUMB officer or coordinator: Hassan Ghazi in Africa, Ryoung Hyi Cho in Asia, and Leonardo Fernandez in Latin America.

WFUMB participates in the free WFUMB journal, providing subscribers in electronic format

to newly centers in developing and emerging countries. The Global Ultrasound Education Center Foundation (GUECF), organized by Barry Goldberg, provides a mechanism for providing education in developing countries. See page 4, "Making a Difference?" for a full list of WFUMB's recent activities.

WFUMB is dedicated to the advancement of ULTRASOUND BY PROMOTING RESEARCH, EDUCATION, INTERNATIONAL COOPERATION, INTERDISCIPLINARY RESEARCH, INNOVATION AND IMPROVING CONCEPTS AND UNDERSTANDING IN THE WORLD COMMUNITY.

WFUMB SUPPORTS ON SAFETY OF MEMBERSHIP OF THE USE OF ULTRASOUND

INTRODUCTION AND PURPOSE

The World Federation for Ultrasound in Medicine and Biology (WFUMB) is an international organization of scientists, engineers, and medical professionals who are interested in the use of ultrasound in medicine and biology. The purpose of this document is to provide information on the safety of ultrasound in medicine and biology. The document is intended for use by medical professionals and researchers who are interested in the use of ultrasound in medicine and biology.

The document is organized into several sections. The first section, "Introduction and Purpose," provides an overview of the document and its purpose. The second section, "Safety of Ultrasound in Medicine and Biology," discusses the safety of ultrasound in various medical and biological applications. The third section, "Recommendations on the Safe Use of Ultrasound Contrast Agents," provides specific recommendations for the safe use of contrast agents in ultrasound imaging.

The document is intended to provide a comprehensive overview of the safety of ultrasound in medicine and biology. It is intended to be used by medical professionals and researchers who are interested in the use of ultrasound in medicine and biology.

RECOMMENDATION ON THE SAFE USE OF ULTRASOUND CONTRAST AGENTS

Society B. Borecz's Practice Data and Martin Zeman

1. Clinical applications and safety concerns

Clinical uses should be limited to the intended clinical use of the contrast agent. The safety of the contrast agent should be evaluated in the context of the clinical application. The safety of the contrast agent should be evaluated in the context of the clinical application. The safety of the contrast agent should be evaluated in the context of the clinical application.

2. Patient safety

The safety of the contrast agent should be evaluated in the context of the clinical application. The safety of the contrast agent should be evaluated in the context of the clinical application. The safety of the contrast agent should be evaluated in the context of the clinical application.

3. Conclusions

The safety of the contrast agent should be evaluated in the context of the clinical application. The safety of the contrast agent should be evaluated in the context of the clinical application. The safety of the contrast agent should be evaluated in the context of the clinical application.
