Malaysia's Bid to host
**The 11th Congress of the
Asian Federation of Societies
for Ultrasound in Medicine and Biology
(AFSUMB) 2014**

ASIAN FEDERATION OF SOCIETIES
FOR ULTRASOUND
IN MEDICINE AND BIOLOGY

Malaysian Society
for Ultrasound in Medicine
(MSUM)

Malaysia, cordially invites the Asian Federation of Societies for Ultrasound in Medicine and Biology (AFSUMB) to stage the 11th Congress of the Asian Federation of Societies for Ultrasound in Medicine and Biology (AFSUMB Congress) 2014 in Kuala Lumpur, Malaysia.

Malaysian Society of Ultrasound in Medicine

Malaysian Society of Ultrasound in Medicine was formed in 1982. It joined the AFSUMB as a founding member in 1987. As an active member, we bid and successfully ran the 6th AFSUMB congress in Kuala Lumpur in October 2001.

The local organizing committee is headed by Dr. T.P. Baskaran as the Chairman, Dr. Amir as the Secretary, Dr. Anushya as the Treasurer and 3 other committee members. The scientific committee is made up of leading professionals in the fields of radiology, obstetrics and gynaecology and other fields of medicine.

Congress Objective

The main objective of the hosting the AFSUMB is to increase the networking and collaboration which may arise from this event between the local members and the regional members. In addition it will also create avenues for exchange of ideas and research projects. The local participants will also have a chance to listen to leaders in ultrasound at the congress. AFSUMB on the other hand will benefit from the excellent venue which will be provided by the local organizing committee as well as the well-known hospitality of Malaysia.

AFSUMB 2014 Theme

The local committee has proposed the theme
'Converting Ultrasound images to Clinical Excellence'
for the 11th AFSUMB keeping in mind that there is an increasing role of ultrasound in delivering optimal management in many areas of medicine.

We hope to ensure that the scientific programme will be tailored with this theme. It is also hoped that, the participants will be encouraged to present their clinical experience in the form of scientific papers.

Destination

South East Asia has a population of over 622 million people and with its neighbours of Southern Asia and North East Asia it accounts for over 50% of the world's population.

Malaysia

Malaysia is an easy place to stage international conventions. English is widely spoken yet it is multilingual. Malaysia's mix of Malay, Chinese, Indian, Middle Eastern and Western cultures means it can cater well for a diversity of food, language and cultural needs.

Malaysia is emerging as a role model for other developing countries making it an attractive destination and centre as the leading electrical and electronic product exporters worldwide. It is the true melting pot of Asia as the major cultures of China, India and the Malay Race flourish in an exciting blend of multi-ethnic experiences.

Proposed Dates

The meeting space has been reserved from 29th October - 1st November 2014 at the proposed meeting venue - Kuala Lumpur Convention Centre. It is strategically located at the city centre with excellent public facilities, local transportation link and choice of accommodation to cater for AFSUMS Congress delegate's needs.

Meet "Mr. Bones"

With our roots in the original "Kiehl Pharmacy"—located at 13th Street and 3rd Avenue in New York City—Kiehl's Since 1851 has long and rich scientific traditions in chemistry, pharmacology and medical research as well as a profound respect for the medical community. It is in this spirit that we present the accompanying skeleton, "Mr. Bones". While Mr. Bones is an "anatomically correct" replica of a human skeletal system, he is not composed of actual human bones (much to his chagrin).
