ABOUT THE PHILIPPINE SOCIETY OF ULTRASOUND IN CLINICAL MEDICINE, INC. (PSUCMI)

The Philippine Society of Ultrasound in Clinical Medicine, Inc. (PSUCMI) is the only Ultrasound Society in the Philippines with members belonging to the different specialties, such as Obstetrics & Gynecology, Pediatrics & Neonatology, Radiology, Surgery, Cardiology, Vascular Medicine, Rehabilitation Medicine and General Medicine.

The objectives of the society are to promote the discipline of Ultrasound in Clinical Medicine and to advance the art & science of ultrasound in medicine & biology.

It is an affiliate society of the Philippine Medical Association (PMA), and the only ultrasound society in the Philippines affiliated with the Asian Federation of Societies for Ultrasound in Medicine & Biology, (AFSUMB) and the World Federation for Ultrasound in Medicine & Biology (WFUMB).

There are 15 Asian countries who are members of the AFSUMB namely: Japan, Chinese Taipei, Korea, China, Singapore, Thailand, Malaysia, Indonesia, India, Pakistan, Bangladesh, Mongolia, Cambodia, Hongkong & the Philippines, (PSUCMI).

Brief History

Professor Yoshihide Chiba, Secretary General of the AFSUMB was invited as speaker during the 6th Annual Convention of Fetus as a Patient Philippines (FPIP) in November 1997. During that time, Prof. Chiba requested Dr. Corazon Yabes Almirante, President of FPIP to form an Ultrasound society with membership belonging to the different clinical specialties, which will present the Philippines in the AFSUMB. An ad hoc committee was formed in January 1998 with Dr. Almirante as the Chairman, to draft the Constitution and by laws to establish Philippine Society of Ultrasound in Clinical Medicine Inc. (PSUCMI). The Security and Exchange Commission approved the articles of Incorporation and by laws on March 11, 1998.

In October 26, 1998, the application of PSUCMI for affiliation to AFSUMB and WFUMB was approved with an initial membership of 50. The First Ultrasound Awareness Month Celebration in October 2000, was organized successfully by PSUCMI. Prof. Hiroki Watanabe, President of WFUMB and AFSUMB, inducted the officers of PSUCMI in November 2000, who challenged them to organize its first annual convention.

At present, the total number of individual members have increased to 150 and still growing. PSUCMI is accepting application for membership from all clinical specialties. The application and requirements should be submitted to the Committee on Membership or at the PSUCMI Office at 2F UP College of Medicine Annex Bldg.

MESSAGE

*O*n behalf of the Asian Federation of Societies for Ultrasound in Medicine and Biology (AFSUMB), as well as of the World Federation for Ultrasound in Medicine and Biology (WFUMB), I congratulate the Fetus as a Patient Institute for organizing its IXth Annual Convention in Manila, of which main theme is "Ultrasound Revolution in 21st Century".

AFSUMB was first established in 1985 with 6 national bodies of medical ultrasound from China, Japan, Korea, India, Indonesia and Malaysia. Chinese Taipei, Thailand, Bangladesh, Philippines and Singapore joined later. We now have 17,352 members from 12 countries or areas in Asia in 1999, which are the target number among 6 affiliated federations to WFUMB.

WFUMB consists of AFSUMB, EFSUMB (European Federation), AIUM (American Institute), FLAUS (Latin-American Federation), ASUM (Australasian Society) and MASU (Mediterranean and African Society). It covers more than 50 countries in the world, having approximately 45,000 members in total.

Philippine Society of Ultrasound in Clinical Medicine, Inc. (PSUCMI), of which office is common to the Fetus as a Patient Institute, is the only national organization for medical ultrasound in this country. It was affiliated to AFSUMB in 1998 and is now one of the most active and cooperative members of the federation.

Among various activities in the society, the most noticeable contribution may be the education of medical ultrasound to domestic people. For that purpose, this convention is opened not only to society members but also to all doctors who are practicing or are interested in ultrasound.

The aim of AFSUMB is to integrate ultrasonic techniques in biological and medical research and practice, as well as to promote cooperative effort in these areas in Asia. Moreover, AFSUMB contributes to WFUMB a lot in its international activities as the largest organization in it.

I hope that PSUCMI will develop further and will promote its international prestige more and more as a solid member of AFSUMB and WFUMB.

HIROKI WATANABE, M.D.
President, AFSUMB

General Objectives

- To understand the physics of ultrasound and its application in musculoskeletal Ultrasonography
- To learn and identify normal musculoskeletal sono-anatomy
- To demonstrate the proper technique of using the ultrasound machine and its knobs, and the application of the ultrasound transducer
- To learn the standard scanning techniques of the specific joints namely:

1. Shoulder	4. Hip
2. Elbow	5. Knee
3. Wrist and hand	6. Ankle
- To appreciate the basic pathologic sonographic findings in tendinitis, synovitis, muscle tears, joint effusion, hemomyelitis, osteoarthritis
- To realize the importance of musculoskeletal ultrasound in the field of musculoskeletal Conditions and Rheumatology in diagnosis and intervention.
