

International Vascular Biology Meeting 2026

6-10 SEPTEMBER | ADELAIDE, AUSTRALIA

SAVE THE DATE

MEETING THEMES

Atherosclerosis
Blood and lymphatic vascular development
Endothelial cell metabolism during development and disease
Engineering the vasculature
Genetics underpinning vascular diseases
Immune cell trafficking through the vasculature
Mechanobiology in the vasculature
Platelets and thrombosis
Single cell and spatial-omic analyses of vascular development and disease
Stem cells and the vasculature
The blood brain barrier
Transcriptional programming of endothelial cell identity
Tumour vasculature
Vascular heterogeneity
Vascular malformations and anomalies
