The aim of the course is to promote the next generation of scientists and young clinicians with interest in the latest advances of clinical and preclinical disciplines in Parkinson’s disease and movement disorders; to create a common language and generate ideas that will allow development of translational research projects by the next generation researchers in Parkinson’s disease and movement disorders.

Recommended Audience
This course is intended for young general neurologists, young movement disorder specialists, graduate students, post-doctoral students and junior scientists who are under the age of 40.

Registration Fee
Members: $150 USD
Junior/Waived Dues Members: $100 USD
Non-Members: $200 USD

Course Organizers
- Hideki Mochizuki, MD, PhD
  Osaka, Japan
- Shen-Yang Lim, MBBS, MD, FRACP
  Kuala Lumpur, Malaysia
- Carolyn M. Sue, MBBS, PhD, FRACP
  Sydney, Australia

Topics and Speakers
- Diagnosis of Parkinsonian Syndromes: Clinical Points of View
  Beomseok Jeon, South Korea
- Parkinson’s Disease Overview: What Have We Learned After 200 Years?
  Nobutaka Hattori, Japan
- The Microbiome and Neurological Disorders (With a Focus on Parkinson’s Disease and Multiple System Atrophy)
  Ai Huey Tan, Malaysia
- Pharmacological Management of Parkinson’s Disease Motor Features
  Hui-Fang Shang, China
- Overview of the Molecular Mechanisms of Parkinson’s Disease
  Ryosuke Takahashi, Japan
- Autophagy and its Relevance to Movement Disorders
  Tamotsu Yoshimori, Japan
- Alpha-Synuclein Propagation in Parkinson’s Disease and Multiple System Atrophy
  Masato Hasegawa, Japan
- Overview of the Basal Ganglia
  Stella Papa, USA
- Genetics in Parkinson’s Disease
  Tatsushi Toda, Japan
- Mitochondrial Dysfunction in Parkinson’s Disease
  Carolyn Sue, Australia
- iPS: Basic Aspects and Therapeutic Application for Parkinson’s Disease
  Jun Takahashi, Japan
- Cognitive/Behavioral Impairment and Neuroimaging in Parkinson’s Disease
  Etsuro Mori, Japan
- Surgical Therapy for Parkinson’s Disease (Including a Discussion of Mechanisms of Action)
  Haruhiko Kishimo, Japan
- Pharmacological Management of Parkinson’s Disease Non-Motor Features
  Yih-Ru Wu, Taiwan
- Spinocerebellar Ataxias
  Kinya Ishikawa, Japan
- Gene Therapy for Movement Disorders
  Masayuki Nakamori, Japan
- Hyperkinetic Movement Disorders: A Primer
  Shen-Yang Lim, Malaysia
